# WHY SCOOP?

# Unsettling Facts About Dog Waste

### Did you know?

**72.8 million** dogs currently live in the United States. **30,000 tons** of waste is collectively produced every day. That's **10 million tons** of dog waste produced every year.

# That's a lot of dog poop, but what exactly is it doing to our **environment?**

#### Dog waste is NOT fertilizer for your lawn.

In its raw form, it can actually be toxic to your soil. Dog waste needs to first be safely composted in an enclosed system before being considered a beneficial aid to the environment.

#### 2 Just one gram of dog waste can contain as many as 23 million fecal coliform bacteria.

Waste can seep into groundwater and spread salmonella and giardia. This poses a hazard to your pets, your family, and your landscape.

#### Dog fecal matter is a major contributor to stormwater pollution.

One out of three households have at least one dog, and all that dog poop left out can be blown into storm drains, lakes, and streams. When in water, the liquefied waste consumes the oxygen and releases ammonia, which contaminates our resources as well as harms the fish that reside there.

#### Your lawn mower doesn't help, in fact can make it worse. Mowers will actually chop up the waste into smaller pieces and spread it further throughout your yard where you, your children, and your pets continue to step in it and then bring it into your home.

The Centers for Disease Control (CDC) confirms that hookworms, ringworms, tapeworms and Salmonella can be spread by contact with infected dog waste. It can take over one year for dog waste to decay, but even when it has visibly disappeared, the parasite eggs it contained can linger on for years in your soil – leaving your family and your pets vulnerable to serious infection.

## What you can do

Pick it up, ALWAYS.

Hard to find time? Hire a local **pet waste removal company** to clean your yard on a routine basis.

If you don't pick up, it piles up...fast. The average dog discards approximately three quarters of a pound of waste per day, which adds up to 275 pounds

per year. Your yard might be more polluted than you think.
